UNIT – IV.

Curriculum Vitae vs. Résumé

Curriculum Vitae is a longer and a more detailed synopsis than a résumé. It contains a summary of your educational and academic background, as well as teaching and research experience, publications, presentations awards, honors etc

Résumé is a one or two page summary of one's education, skills, accoplishments and experience. The purpose of résumé is to attain the selector's attention.

Difference between CV & Résumé

CV	Résumé
1. It emphasizes academic accomplisments	1. It emphasize skills
2. Used when applying for positions in academia, fellowships & grants	2. Used when applying for a position in industry, non-profit and public sector.
3. Length depends upon experience & includes a complete list of publications, posters, presentations etc.	3. It is not longer than 2 pages with an additional page for publications or poster presentations if highly relevant to the job
4. Starts with education and can include name of advisor and dissertation, title. Used for merit / tenure review etc.	4. After 1 year of industry experience, lead with work experience and place education section at the end.

CURRICULUM VITAE (CV):

A curriculum vitae is a longer (two or more pages) and a more detailed synopsis than a résumé. It contains a summary of candidate's educational and academic background, as well as teaching and research experience, publications, presentations, awards, honours, affiliations and other details.

A CV is required to be clear, concise, complete and up-to-date with current employment and educational information.

A globally accepted common format is given here.

Curriculum Vitae Format I

Your Contact Information
Name, address, telephone, cell phone, email.

Personal Information
Date of birth, place of birth, citizenship, passport no / visa status, gender

Optional Personal Information
Marital status, spouse's name, children

Education:

Employment History

List in chronological order, include position details and dates work history, Academic Positions

Research Skills:

Presentations:

Publications:

Grants and Fellowships:

Awards and Honors

Skills and Qualifications:

References:

Curriculum Vitae Format 2

Name

Date of Birth:

Citizenship:

Address:

Phone:

Off:

Phone: Fax:

E-Mail:

Academic Degrees Earned:

Academic Positions Held:

Research Interests:

Publications:

Teaching Experience:

Conferences Attended:

Future Invitations:

Refereeing and Book Reviewing:

Seminar and Conference Organization:

Prizes and Awards:

Computer Skills:

EDUCATION

B.Tech. Computer Science and Engineering, Indian Institute of Technology, Mumbai (2002 – 2006)

Thesis Title: Effective Algorithm for Terrain Simplification – Fast Rendering
Advisor: Subhadra Rao

Summary: Improves the state of the art in occlusion plane detection, given terrain data. My implementation showed .... 2 – 3 lines

St. Xavier's School, Mumbai (Graduated 2000)

Ranked 1st in school in 12th C.B.S.E. Board Examination.

PROJECT WORK (B. Tech)

- Developed an optimizing compiler for mC++, a C++ subset with support for dynamic object migration over the network between compatible type-spaces.
- Designed a user-level distributed file system based on NFS with write-through caching, fault tolerance and consistency guarantees.

WORK EXPERIENCE

- Research Assistant, TIFR, Mumbai (Aug – Dec 200X): implemented a library of image processing functions for edge detection and de-skewing on scanned images. Adapted an off-the-shelf OCR package to operate on scanned mail images with 95% address recognition accuracy at the city/pin-code level and 90% at the street level.

- Project Trainee, Spontaneous Networks, Bangalore: (Jan 2005-present): Joined a 17-person startup implementing campus-wide video-on-demand system for corporate training. Implemented the streaming video component with buffering for jitter reduction. Also, bit-rate reduction in the event of congestion to meet frame-rate guarantees. Extensive performance testing was conducted.

COMPUTER SKILLS

- Software: SQL Server, Apache, CVS, Mathematica, Latex. Also, audio/video formats and codecs. Languages: C/C++, STL,
- Platforms: Linux, FreeBSD, NT 4.0, 2000.

PUBLICATIONS

Occlusion Culling using Hyperplane Projection, Anil Choudhary, and Subhadra Rao. Graphics Interface '01(2004) pp. 323–333.

AWARDS

- Best B.Tech thesis – 2004. Dept. of Computer Science, IIT Mumbai; Medalist at the International Mathematical Olympiad (IMO), 2003, Seoul, S. Korea.
- Ranked 26th in IIT Joint Entrance Examination – 2001.

Statement of Purpose (SOP)

An statement of purpose generally referred as SOP, is an essay that explains your intent to study abroad, what is your academic and professional interest, and value you will give/provide to the graduate program you are applying for

SOP is reviewed by the admission panel and usually includes content related to your career, path, interest, professional contributions, goals; and the reason that encouraged you to pursue a particular program. We can say that SOP is the first introduction of the candidate to the university as an applicant and it communicates his personality, intent and goals to the selection committee of a university.

It is usually written in the form of an essay but there are exceptions too, as now a days many university keep it question-based. It is an important deciding document for getting admission in the desired course into any preferred institution.

Importance of an Statement of Purpose:

An SOP allows a candidate to highlight his overall personality to the university. If someone has a weak profile, a good SOP compansate for it by highlighting his ambitions and future goals. The university assess a candidate on the basis of his present and plans rather than his performance in the past.

Process of Writing a good Statement of Purpose

The content of the SOP should be structured, well written, and develop a story. Below is the perfect format for writing the statement of Purpose.

1. Introduction:

It should be started with describing your childhood, what were the things which interested you when you were a little kid and how it shaped you as a person.

a. Part 1:

Subtly we should talk about our undergrad achievements, and should mention our current subjects that encouraged us towards the course.

b. Part 2:

Explain the projects, internships, trainings

c. Part 3: We have to explain like what we like about their university e.g., Research, Faculty, Labs, campus, courses etc.

d. Part 4: We need to explain our short-term and Long-term goals, like where we see ourself in 5-years

2. Conclusion: In the end it should be added like how we will be a valuable asset to the university and our home country.

To make the SOP impactful, we need to follow the following steps:

1. Plan well:

We need to create an outline for our SOP and work accordingly. It is good to share an anecdote which explains how the interest of the candidate, developed in a particular subject. It will develop the introduction in a good way. We will create pointers and categories and list down our relevant achievments and expertise. and most importantly our reason to select the course and the University.

2. Work on your draft:

Focus should be on sharing our learnings and knowledge during the education and industry experience. The use of

c. Part 3: We have to explain like what we like about their university e.g., Research, Faculty, Labs, campus, courses etc.

It will develop the introduction in a good way. We will create pointers and categories and list down our relevant achievments and expertise. and most importantly our reason to select the course and the University.

2. Work on your draft:

Focus should be on sharing our learnings and knowledge during the education and industry experience. The use of

technical terms must be limited and should use an active voice when writing our SOP., if there is a gap year or an academic issue, it must be addressed optimistically. It must be ensured that our SOP has a clear introduction and conclusion and should always be written in a reverse chronological order.

3: Must Review before you send.

It is very important step. Re-analysing will help to correct the flow, vocabulary, sentence construction errors, and other grammer issues. Get a second opinion, may be from your professor, senior or an IDP counsellor. Document must be proofread properly and double-checked before submission.

While writing an impactful SOP we should try not to go overboard. It is best to stick to the word limit. The word limit of an SOP is ideally between 800-1500 words. We should choose our words wisely to be precise and write the assay which is easy to understand and does not repeat or exceed the word count.
